

APPENDIX L

INSPECTIONS

Appendix L –

Inspections within the East Waterway Drainage Basins

Introduction:

Inspection information is useful to determine the density of properties and business inspections in the East Waterway (EW) drainage basins. Compliance and inspection programs are conducted by various agencies to identify and manage potential sources of contaminants that are typically generated from business practices within the EW drainage basin. The Port of Seattle, King County, and City of Seattle conduct various assessments or inspections to enhance compliance based on their applicable regulatory authority or land ownership. This appendix presents the following:

- Table L-1: Port of Seattle ECAP summary of recommendations (2008-2012)
- Table L-2: East Waterway Source Control inspections (SPU and King County)
- Table L-3: King County Industrial Waste Program inspections
- Table L-4: City of Seattle Source Control BMPs

Port ECAP Table L-1 Introduction

A summary of the Port of Seattle Environmental Compliance Assessment Program (ECAP) inspections for EW properties is presented by terminal and tenant in Table 1 from 2008 to 2012. As part of ECAP, some inspections may be more abbreviated depending on the purpose of the assessment (e.g. Construction inspection or tenant lease end assessments). However, all assessments conducted in the EW drainage have been comprehensive facility assessments to date.

Several categories are reviewed during each ECAP visit as part of a comprehensive environmental assessment (including review of compliance databases, site status review, materials use, and hazardous communications). However, for the purposes of source control evaluations only the categories most relevant to source control of contaminants into the waterway are summarized on this table, including.

- Hazardous waste handling and recordkeeping
- Petroleum storage tank status, including presence, integrity and inventory records
- Spill response preparation, planning and records review
- Waste water discharge status issues
- Stormwater compliance documentation and maintenance issues.

					Follow-up Identified in ECAP Assessment				
Facility	Tenant Name	Date of Inspection	Type of Inspection	Facility Waste Generator Status	Hazardous Waste	Petroleum Storage Tanks	Spill Response	Waste Water	Storm Water
T102	Puget Sound Institute of Pathology	2008	Facility	MQG	X

SQG - Small Quantity Generator

LQG - Large Quantity Generator

MQG - Medium Quantity Generator

SPU and King County East Waterway Source Control Inspections Table L-2 Introduction

Business inspected between 2003 and 2011 as part of source control efforts in the EW by the City of Seattle and King County are listed in Table L-2. Inspectors evaluate hazardous waste, industrial waste, spills, and stormwater-related issues at each site. As explained in Section 9.3.4.3, following each inspection, inspectors notify the business owner/operator of problems found and corrective actions required to come into compliance with City of Seattle Stormwater Code pollution prevention requirements. Corrective actions are tracked in the City of Seattle business inspection database. The types of corrective actions typically required during business inspections include:

No.	Description	Program Area
1	Obtain proper permit for facility discharge	IW
2	Implement pretreatment for wastewater discharge	IW
3	Properly document waste disposal	HW
4	Properly store product/waste	HW
5	Properly label waste containers	HW
6	Repair or replace degraded open chemical containers	HW
7	Develop and implement spill response procedures	SP
8	Improve or purchase adequate spill response materials	SP
9	Properly educate employees regarding spill control/containment procedures	SP
10	Clean onsite storm drain system/structures	SW
11	Replace or repair missing or damaged components to onsite storm drain system/structures	SW
12	Make onsite storm drain system/structures accessible for inspection	SW
13	Eliminate illicit connection	SW
14	Implement proper housekeeping	SW
15	Stop discharging process wastewater to storm drain	SW
16	Implement proper washing practices	SW
17	Properly store containerized materials	SW
18	Properly store non-containerized materials	SW
19	Implement proper fueling operations	SW
20	Properly perform maintenance of vehicles and equipment	SW
21	Implement proper material transfer practices	SW
22	Clean and eliminate leaks and spills from storage areas	SP
23	Properly dispose of waste	HW
24	Maintain pretreatment system	IW
25	Obtain NPDES permit for discharge	SW
26	Properly designate waste	HW

Notes:

IW = Industrial waste

SW = Stormwater

HW = Hazardous waste

SP = Spill control/containment.

Numbers of corrective actions required at each site for each of these four program areas are displayed in Table L-2.

King County Industrial Waste Inspections Table L-3 Introduction

Table L-3 provides a list of companies located within the EW CSO basins that have been inspected by the King County Industrial Waste Program (KCIW) from 2003 to 2012. The last inspection date listed for each company is the last date KCIW staff inspected the site. Inspection frequencies vary according to the nature of operation, type of permit issued to the company, purpose of inspection and facility compliance status. KCIW conducts site inspections for many reasons or events. However, the underlying reason for inspection is defined by the Program's mission: to protect the wastewater collection system, treatment plants, the quality of biosolids produced, wastewater personnel and the environment. The types of inspections listed in this table are used by KCIW for tracking and administrative purposes.

Inspection Type	Description
INSP_DA_RENEWAL	Inspections conducted as part of the permitting process for new or renewed Discharge Authorizations
INSP_SOURCE_CTL	Inspections conducted for source control projects
INSP_DENTAL	Inspections conducted at dental practices
INSP_FULL_SIU	Annual Compliance inspections conducted at companies designated as Significant Industrial Users by KCIW
INSP_MISC	Miscellaneous Inspections conducted at industrial facilities
INSP_PVIMP	Post-Violation Inspections conducted by KCIW following enforcement actions to verify return to compliance

Not all facilities inspected by KCIW are permitted by our program. The Permit No. listed refers to the permit number assigned to the company at the time the inspection was performed.

Company Name	Address	City	Last Inspection Date	Inspection Type	Permit	Customer Type

City of Seattle Source Control BMPs Table L-4 Introduction:

The City of Seattle's source control technical requirements manual (2009a), identifies 6 general and 38 site specific best management practices (BMPs) for certain industrial activities. These BMPs are summarized in Table L-4.

Table L4
City of Seattle Source Control BMPs

BMP Number	BMP Description
1	Eliminate illicit connections to storm drains
2	Perform routine maintenance for drainage system
3	Properly dispose fluids and wastes
4	Proper storage of solid waste
5	Spill prevention and cleanup
6	Staff training and oversight
7	Cleaning or washing of tools, engines, and manufacturing equipment
8	Cleaning or washing of food service establishment equipment
9	Washing, pressure washing, and steam cleaning of vehicles, equipment, and building structures
10	Collection and disposal of wastewater from mobile interior washing operations
11	Loading or unloading of liquid or solid material
12	Fueling at dedicated stations
13	Automotive repair and maintenance
14	Mobile fueling of vehicles and heavy equipment
15	Concrete and asphalt mixing and production at stationary sites
16	Concrete pouring, concrete/asphalt cutting, and asphalt production
17	Manufacturing and post-processing of metal products
18	Wood treatment
19	Commercial composting
20	Landscaping and lawn and vegetation management
21	Painting, finishing, and coating of vehicles, boats, buildings, and equipment
22	Commercial printing operations
23	Outdoor manufacturing operations
24	Outdoor storage or transfer of solid raw materials, byproducts, or finished products
25	Storage and treatment of contaminated soil
26	Temporary storage or processing of fruits or vegetables
27	Recycling, wrecking yard, and scrap yard operations
28	Outdoor portable container storage
29	Storage of liquids in permanent aboveground tanks
30	Parking lot maintenance and storage of vehicles and equipment
31	Dust control in disturbed land areas and on unpaved roadways and parking lots
32	Dust control at manufacturing sites
33	Soil erosion and sediment control at industrial sites
34	Commercial animal care and handling
35	Log sorting and handling
36	Boat building, mooring, maintenance, and repair

BMP Number	BMP Description
37	Logging and tree removal
38	Mining and quarrying of sand, gravel, rock, peat, clay, and other materials
39	Cleaning and maintenance of swimming pools and spas
40	Deicing and anti-icing operations for airports and streets
41	Maintenance and management of roof and building drains at manufacturing and commercial buildings
42	Maintenance and operations of railroad yards
43	Maintenance of public and private utility corridors and facilities
44	Maintenance of roadside ditches
